Profile

Developer by passion with specific skills in client-server applications, and a strong background in software engineering in general. Engaged throughout the whole software development process, constantly focusing on the user's satisfaction by providing efficient solutions in software design and implementation. Currently involved, as technical leader, in several projects and consultancy activities, I am looking for a challenging position in an Agile development team highly motivated and offering opportunities for career advancement.

Experience

CSTB - Senior R&D engineer – 2010 / now
Working in a fast paced environment and producing a high volume of applications. Polyglot web developer, I am responsible for developing high skilled applications with agility, dealing both with big consortia and a small technical team.

CSTB - R&D engineer – 2006 / 2010
Involvement as a technical solution provider in several EC funded R&D projects and consultancy activities.

Open source software - Author, member, contributor - 2004 / now
I've always pushed myself in personal projects and open source applications. Since 2010, I am a member of the Woko framework, a full stack web framework for Java/JEE applications. More information is available on my GitHub page.

Nice-Sophia Antipolis University – 2008 / 2010
POO and IHM teacher in Licence MIAGE, 110 hours per year.

Education

MIAGE - Nice-Sophia Antipolis University - 2003 / 2006
Master degree in software engineering and management.

IUT - Nice-Sophia Antipolis University - 2001 / 2003
Two years Technical degree in Computer Science.
